CANANEA

A Decisive Struggle Is Preparing in Sonora Country

FORCES ARE EVENLY MATCHED

Obergon Now Sending His Cavalry South-Bullion Seized

Douglas, Ariz., Nov. 19 .- That the battle of Cananca will be a decisive struggle which will determine the balance of power in Sonora, in the immediate future, seemed certain yesterday. Reliable reports received from Cananca state that General Rodiguez has between five and six thousand men, while 2,000 reinforcements are within easy marching distance on the Sonora river.

The Carranza and Villa armies are bout evenly matched numerically, with slight advantage in numbers in favor of the latter, it is said, if the cavalry detachment is recalled from Arizipe. General Obregon plans sending his cavalry south, following the line of the Southern Pacific, while his infantry and artillery ENTED DEVICES are divided into two columns, one going to the east and one to the west of the San Jose mountains which stand between Naco and Cananea.

General Villa has approximately 6500 troops between Magdalena and Hermosil-

Ten carloads of copper bullion were seized from the Cananea Consolidated Copper company and taken to Nogales, where it arrived Wednesday night. Ten additional carloads are reported to be between Del Bio and Nogales en route to Nogales. How Villa proposes to use this metal at Nogales has not been explained. The shipment at Nogales is said to amount to 1250 tons.

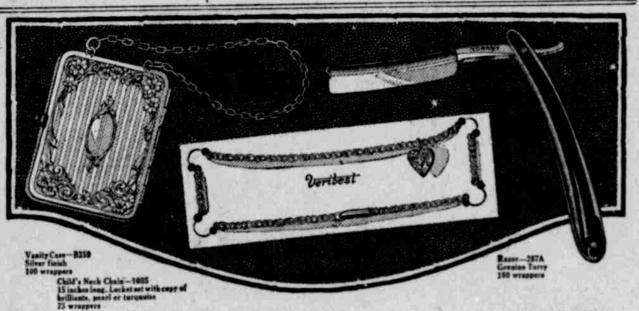

Does the Shape of a Cow Show How Much She Gives?

"Several years ago an agricultural teacher in Germany began an investigacontract with the navy department, tion for the purpose of testing the truth of the claims of dairy breeders that "The navy department has employed they can judge a cow by her build and Simon to construct radio apparatus, with-

This is what he did and what he his work an injury to the naval arm of learned: "He divided the cows used in the government will result. Therefore, the examination into five classes, using only cows yielding from 4,400 to 8,000

ounds of milk per year,
"He made up his mind and published his findings, to the effect that there is no relationship between milk yield and type. The only indications which seem to have any real meaning are those relating to the milk veins, the udder, the teats, and the milk organs generally. A commander of the British expedition at silly and absurd, but most of them are the Dardanelles, had reported in favor of the withdrawal of the British army at them, and you'll discover yourself in difficulty."

teats, and the mik organs generally. I cow having these organs properly developed seemed quite as likely to be a good milker, if she was beety, as if she were of the "true dairy type." the "true dairy type."

BARRE, VERMONT

the millions of cases of spinal curvature ods are making their way into the kin- In solving the problem of raising the sively to regular military discipline and the milions of cases of spinal curvature and other structural defects in children, as well as in adults; the uncounted milions of those who are occasionally sick, or half sick all the time, frequently sick, or half sick all the time, from avoidable diseases. Consider how large a percentage of the population is ignorantly addicted to pasent medicines, or to medicines prescribed by doctors. Consider alone the significance of the grand army of a hundred and fifty thou-

efficiency, if they were disciplined for the demands of a streamons peace, the problem of military preparedness would be greatly simplified; for the physical and moral training that makes for an efficient life in almost any civil vocation would go far toward the making of good

Apart from his technical knowledge of the war game, what are some of the

qualifications of a good soldier ! It is not enough that he be merely fre from disease; he must be sound of limb and of vital organs. He must have a and of vital organs. He must have a world well-developed and well-disciplined must it. cular system, and stendiness of nerves. He must be hardy of both body and mind; able to undergo hardship with equanimity and to recuperate quickly. He needs to be well-set-up; of good car-riage, alert, active, self-reliant, able to adapt himself to various and difficult circumutaness. He needs to have a sense of responsibility, to be conscious of, and loyal to, his organization. He needs to love life well enough to take good care of himsel, but to have no craven fear of death in the service of his country.

Are not such qualities equally desirable in the civilian' Would not the industrial, commercial and professional effictions, and the well-being and happi-ness of the people of the United States he enormously increased if such training as would develop these qualities were

It will be readily admitted that there ; is need of a larger and more orderly drvolopment of all the socially useful powers of the individuals of the nation, those of the body, no has than these of the

And, since the attainment of this end is a problem of popular education, we bigginally turn for its solution to that great instrument of our democracy, the public whool. But before it een answer our purpose we shall have to experience a considerable enlargement of our pleas of education. For hitherto, or at least until recently, our schools have how as necessed with, and have laid such emphasis upon, the training of the mind, that they have largely neglected the bodies of the pupils. Observed as we have been, and will are, with an evapperated notice of the importance of having the pupils learn and recits bosons from test hooks. we have neglected to guide them toward a barmonious development of their physical powers: we have even fallen for short of the training of their minds. So much so, that a careful Am tran shserver, Mr. Normes Happool, recently genlared that for every intellectually ma-

"Uncle Sam the Unready."

Since August, 1914, there has been no dearth of discussion of the subject of our admitted unprepar dness for war: but a survey of the state of the physical education.

And fortunately for democracy and the well-being of the people, our education, and especially of the physical education, and especially of the physical education.

And fortunately for democracy and the well-being of the people, our education, and especially of the physical education.

And fortunately for democracy and the well-being of the people, our education, and especially of the physical education.

And fortunately for democracy and the well-being of the people, our education, and especially of the physical education.

And fortunately for democracy and the well-being of the people, our education, and especially of the physical education.

And fortunately for democracy and the will not only know something of him self and of the world in which he is to live and serve, but he will have had the live and serve, but he will have had the necessary elementary training and development of mind, morals and muscle well-being and domestic science befor vigorous life, for efficient, democratic came accepted parts of the high school citizenship, and for a particular service

Consider alone the significance of the grand army of a hundred and fifty thousand regular physicians and surgeons!

What is wrong? Why is sound health exceptional, and a sub-normal condition the rule?

But the public schools must be fitted exceptional, and a sub-normal condition the rule?

Our thesis is that it is due mainly to the low state of physical culture that coltains in the country. If the physical culture that coltains in the country. If the physical to the schools of at to physical culture in Y. W. and Y. M. So the public schools as a unifying force in our democracy.

And who will say there is not great need of such a unifying force? Who will say there is not great need of a better understanding and appreciation of decountry. If the physical culture that the country. If the physical culture that the second is the second in the significance of the public schools as a unifying force in our democracy.

And who will say there is not great need of such a unifying force in our democracy.

And who will say there is not great need of such as made a special study of the body with such an end in view.

Regular exercises, supplemented by period.

feetly practicable and indispensable task ters!- The Ostcopathic Magazine. of bringing the youth of both sexes of the nation up to a higher standard of physical vigor and competency, we must look largely to the public schools.

In our democracy these institutions are absolutely fundamental; but if they are to nurture the men and women who are to save our democracy from destruc-tion, whether by foce from within or \$5-Cent Bottle Destroys Dandruff and without, they must be moulded anew to the national need. And certainly one aspect of that need is a high order of

physical training.

Let it be conceded that school athletics and gymnasium work, when they are carried en, as often they are not, under the direction of enthusiastic and competent teachers, are even now doing much for the pupil's well-being. But these activities are commonly lacking in proper supervision, and in special adaptation to the capacities and requirements of the individual. They are voluntary; they, therefore, enlist the active participation of only a part of the student body; they are not a graded and progressive disciplination of the pupil's well-being the student body; they are not a graded and progressive disciplination of only a part of the student body; they are not a graded and progressive disciplination of only a part of the student body; they are not a graded and progressive disciplination of only a part of the student body; they are not a graded and progressive disciplination as cloth with Danderine and are not a graded and progressive discipline; they lead nowhere, except in the
case of athleties, where the prizes are
dazzling but few. They are not looked
upon as integral parts of the scholastic
course; they are too often regarded by
the teaching staff and by parents as
something distinctly subordinate, if not
